Ease the integration, preparation and processing of various data sources for coastal downstream applications

- Sentinel 1, 2 and 3 products from ESA and Eumetsat
- Landsat 8, Proba-V and other satellite data
- Water quality processing of high resolution, medium resolution and geostationary data from HIGHROC processing chain
- Validated HIGHROC data and validation tools
- User provided, individually configured processing chains
- Copernicus Marine, Land and Climate Service data
- In-situ data from open service (ICES, NCEP, ...)
- User’s local storage

**E=DataBee** is our datacube software
- Provided with accompanying services by water colour and ICT experts for institutional, research and commercial users (IBU)
- Deployable on DIAS, AWS, Calvalus and private clouds.
